In the case of summary or paraphrase, references should appear in brackets with the author's name, followed by the year (Smith, 2001), or (Smith and White, 2001) or in the case of multiple authors (Smith et al., 2001); if the author is not known, give the title of the work and the year (Climate Change, 2009). If the same author has published more than two papers at the same year, then the papers are alphabetically separated, i.e. (Hall, 1990a; 1990b). Tables must have titles and must be referenced from within the text. We remark that, all Tables and Figures should be included in one file, and integrated into the text at the appropriate points (not in an appendix), unless there are large and interrupt the flow of the text. In this case they should be appended and numbered consecutively in Arabic numerals with a descriptive caption. Appendix should be placed at the end of your paper, after the references.

Avoid colour images as the journal is printed in black and white. Illustrations should be preferably included into the text as objects. They should be consecutively numbered in Arabic numerals with the heading always above the Table or Figure; they should be typed in bold font 12, single line spacing and the source beneath, also single line spacing. Please leave one line empty before and after every illustration and/or Table.

Table 1: Table captions should always be positioned above the Tables. The final sentence of a Table caption should end without a period
